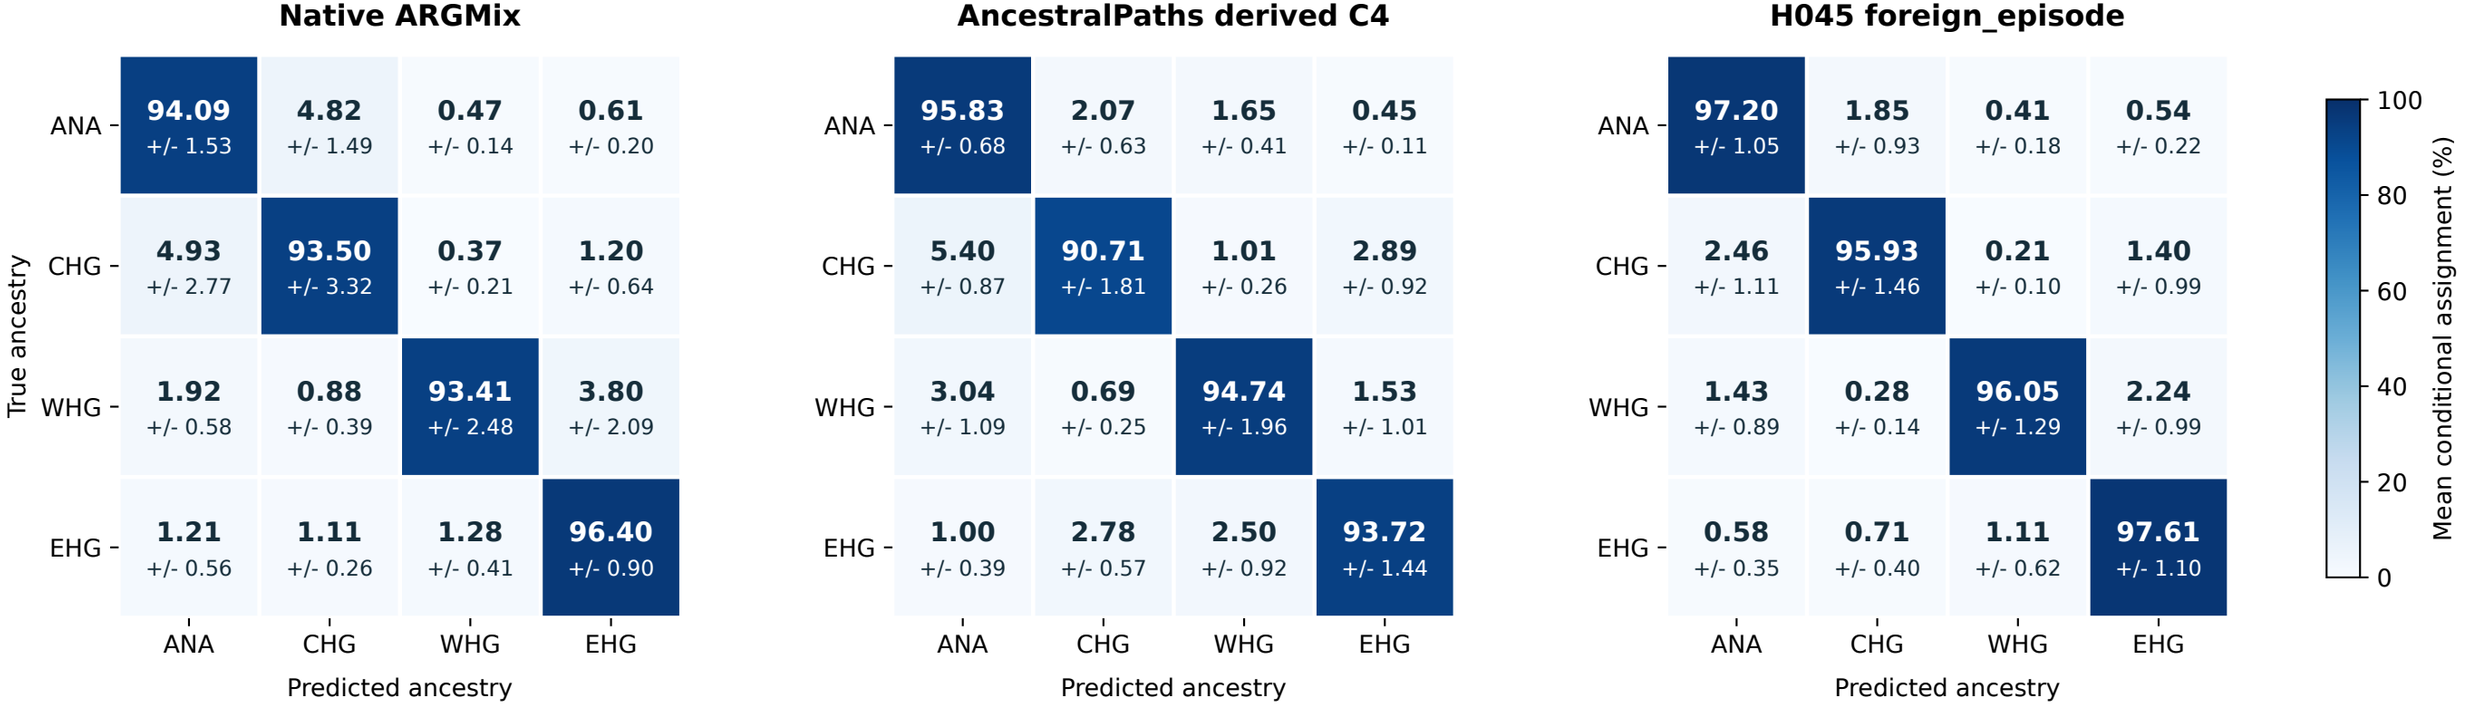
Present182 ancestry confusion on shared recorded support

Normalize true-class rows within each VAL parent, then average eight parents

Cell labels: mean % | +/- sample SD in percentage points



European C4 | 32 TRAIN / 8 VAL | 2 Mb nominal | 182 present-day queries per parent

Common recorded support verified exactly across methods. Inputs, objectives and training budgets differ.

Development evidence; no architecture attribution or original-paper reproduction claim. SD is across parents, not optimizer seeds.
